Up to 4 times longer use compared to the standard batteries

Advantages of Lithium-Ion Batteries:

- Compact and lightweight
- Continuous work for longer periods
- When not in use for a long time; no breakdown and no self-discharge is seen.
- Decrease in capacity is not a risk

You can check the battery level simply with its LED display.

Grip handle,

Vibration inhibitor system.

It minimizes shaking by reducing the vibration, easy to use for long-term works.

27 Joules impact power it enables easy break with its high impact force.

Impact-drilling and breaking functions.

Magnesium body.

Grip limitation system avoids high torqued rebound that can occur during drill bit jam.

Ergonomic and adjustable handle lets you do your job easily by adjusting the handle suitably to your position.

Power	5 kW
Voltage	380-400 V
Air Consumption	588 m ³ / Hour
Temperature	0-85 ° C
Thermostat	Yes
Heating Method	Ceramic Heating Element
Recommended Heating Area	50 m ²
Cable Length	1.6 M
Dimensions	330*235*345mm
Net Weight	4,36 Kg
Pcs	1

- The ceramic heater does not burn out oxygen in the room. The room does not get stuffy when using the heater.
- Does not ignite dust that has fallen on it. There is no unpleasant burnt smell during heating.
- The air flow direction is regulated by the fan inclination. No additional tools are required to change the airflow angle.
- The operating mode and heating intensity are set with rotary knobs from above. The controls are simple and straightforward.
- 3 operating modes: airing, half power and full power. In ventilation mode, replaces the conventional fan.
- The device is to in handy even in the warm season.
